

STORMWATER MANAGEMENT

WORKFLOW DIAGRAM

My project is defined as a redevelopment activity per § 913.07.

NO

YES

My project creates less than 400 SF of additional impervious area and my earth disturbance is less than 10,890 SF.*

**This assumes no impervious area falling into this category has been added to this development previously. If additional impervious surfaces have been previously added and not analyzed for stormwater management, you must consider this impervious area in your submission's analysis.*

NO

My project creates less than 2,500 SF of additional impervious area and my earth disturbance is between 10,890 SF and 43,559 SF.

NO

My project creates between 400 SF and 2,500 SF of additional impervious area and my earth disturbance is less than 43,559 SF.

NO

My project creates more than 2,500 SF of additional impervious area or my earth disturbance exceeds 43,559 SF.

YES

My project must meet the design standards of § 913.14 (c) (1) and (3).

YES

My project requires no stormwater management.

YES

My project is considered a small project exemption per § 913.06 (b). My project must capture and detain the first 2" of runoff from the net increase in impervious area and meet the Small Project design standards within Appendix F of the Stormwater Management Ordinance.

YES →

All sections of the Stormwater Management Ordinance shall be reviewed and my project shall comply with all requirements.
